

# CRYSTAL BALL

## FROM RAINSHOW'R

When water comes in contact with the media filaments inside the fabric pouch, the chlorine ions in the water are converted into harmless chloride.

Quartz crystals mixed with the media filaments reduce the molecular structure of the water into smaller clusters, thereby allowing enhanced lathering of soap.

### **Removes up to 100% of free chlorine**

- **Healthier, younger looking skin**
- **Safe for infants, adults & pets**
- **Replaceable filter media**
- **Dechlorinates in minutes**
